Hiring Manager

Bain & Company

Subject: Application for DevOps Engineer Position

Dear Hiring Manager,

I am writing to express my interest in the DevOps Engineer position at Bain & Company. With 7 years of experience in Cloud Engineering, DevOps, and Platform Automation, along with 4 years of experience supporting AI/ML and MLOps initiatives, I am excited about the opportunity to contribute to Bain's technology-driven transformation and innovation efforts.

Throughout my career, I have designed, implemented, and optimized cloud-native infrastructure across Azure and AWS environments. My expertise includes Kubernetes (AKS/EKS), Docker, Terraform, Azure DevOps, GitHub Actions, CI/CD automation, Infrastructure as Code, and cloud security best practices. I have successfully built scalable deployment pipelines, automated infrastructure provisioning, improved system reliability, and reduced deployment times across enterprise environments.

In my recent roles, I have worked extensively with containerized workloads, Kubernetes-based platforms, and cloud modernization initiatives. I have led the implementation of Infrastructure as Code using Terraform, automated application deployments through CI/CD pipelines, and supported high-availability production environments. Additionally, my experience in MLOps and AI infrastructure has enabled me to collaborate effectively with data science teams to streamline model deployment, monitoring, and lifecycle management.

What particularly attracts me to Bain & Company is its reputation for combining world-class consulting expertise with cutting-edge technology solutions to solve complex business challenges. I am excited by the opportunity to work in a highly collaborative environment where innovation, continuous learning, and operational excellence are core values.

Key qualifications I would bring to Bain include:

- 7 years of DevOps, Cloud, and Platform Engineering experience.
- Expertise in Azure, AWS, Kubernetes, Docker, and Terraform.
- Strong experience with Azure DevOps, GitHub Actions, and CI/CD automation.
- Proven ability to build scalable, secure, and highly available cloud infrastructure.
- Experience supporting AI/ML platforms and MLOps workflows.
- Strong troubleshooting, automation, and operational excellence mindset.
- Experience working across BFSI, Healthcare, and Travel domains.

I would welcome the opportunity to discuss how my technical expertise and passion for automation can contribute to Bain's engineering and digital transformation initiatives. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Mohit Chaudhary
